### INSTALLATION TIPS

- Install product according to Owners Manual and local codes.
- All units with an Airbath III may be 1 1/2" - 2 1/2" higher than stated.
- Any whirlpool or Airbath® unit requires an access panel.
- Hot water supply should be 65-75% of tub capacity or greater. Always consult your local plumber for recommendations as installations will vary.
- When ordering for undermount installation, always advise Americh to assure there are no issues with deck mounted controls.
- Dimensions for undermount installation should be taken directly from the bathtub.
- For oval or specialty shapes, Americh recommends you wait until you have the actual unit or contact us for a template.
